Education & Training

[Full Stack Web Development & Computer Science](#) - Lambda School, Remote Dec 2019 - Nov 2020

- Lambda School is a 9 month accelerated program with an immersive (full-time, 40+ hours/week) hands-on curriculum with a focus on computer science, software engineering, and web development

[Associate of Arts \(Social and Behavioral Studies\)](#) - Moreno Valley College, Moreno Valley Jan 2015 - June 2018

- Moreno Valley College is a community college in Moreno Valley, California. The college is part of the Riverside Community College District and the larger California Community Colleges system.

Technical Skills

React - Redux - JavaScript - Python - HTML - CSS
Jest - React Testing Library - NodeJS - LESS/SASS - Express - Knex - SQL - GraphQL

Technical Projects

[Community Calendar](#) - Front-end Developer

[Github](#)

Web app designed for users to find events at a more localized neighborhood level

Tech stack: React | JavaScript | HTML | AWS | Apollo Client | Apollo Server | GraphQL | Prisma

- Developed Front-end unit tests to ensure code quality; increased test-coverage score by over 50%
- Provided creative solution to stakeholder's desire to create a contextual calendar view by merging the home and search page, which ultimately saved time by utilizing our existing features
- Resolved event-card UI bug by enforcing image upload on event creation form
- Implemented Google Analytics API to track and understand user flow and behavior
- Collaborated on a remote cross-functional team to create a cohesive experience between web and iOS, implementing the highest priority features from recently conducted user studies

[Anime Archive](#) - Front-end Developer

[Github](#)

A mobile, web-based, online database of information related to anime

Tech stack: React | JavaScript | HTML | CSS | GraphQL | Netlify | Figma

- Assisted with design, development, and integration of a mobile, user-friendly interface
- Prioritized reusability and readability of components throughout application to minimize code maintenance
- Integrated AniList GraphQL API as our primary source of content for anime entries
- Established search and filter behavior to work interchangeably

[Silent Auction](#) - Front-end Developer

[Github](#)

Application grants unprecedented access to remote auctions

Tech stack: React | Redux | JavaScript | HTML | CSS | Netlify

- Administered redux store, action creators, reducers, and maintained all state data across the web app
- Developed CRUD (Create, Read, Update, Delete) operations in the seller dashboard
- Led a group of 3 engineers to develop a functional marketing page and seller dashboard in under a week

[Weightlifting Journal](#) - Front-end Developer

[Github](#)

Track your muscle building and weight loss progress

Tech stack: HTML | CSS | LESS | Netlify

- Lead designer of marketing page aimed to brief users of our features
- Deployed landing page using Netlify to serve independently from the front-end
- Tailored responsiveness to mobile and web

Work Experience

[Project Reviewer](#) - Lambda, Remote

Mar 2021 - Present

- Contracted by Lambda to provide weekly actionable feedback and code reviews to student developers via Codegrade
- Collaborated with Lead Instructors to support the learning and professional growth of Lambda School students

Reseller - Self-employed, Remote

Jan 2016 - Dec 2020

- Operated store selling brand-name men's clothing, hard-to-find sneakers, art, and accessories
- Analyzed trends and optimized return on investment
- Managed an inventory of over 1,200 items across various third-party platforms
- Serviced customers inquiring about the availability, sizing, status of order(s), product malfunctions, and transaction issues all while maintaining an overall rating of 5 stars on each platform
